

COMPLETED Eastern Pacific Ocean yellowfin tuna - purse seine (TUNACONS)

Overview

FIP Description

This profile was completed by achieving certification of 1 tuna species, only including yellowfin tuna, and a new profile will address the other two species.

Ecuadorian fishing firms created **TUNACONS** in July 2016 as a joint effort to promote a Fisheries Improvement Project (FIP) for purse-seine tuna fisheries. This effort will build a process to achieve Marine Stewardship Council Standard (MSC) certification. Meeting the MSC Standard is widely accepted in global markets with the acknowledgement that a certified fishery's products come from a sustainable production model.

TUNACONS involves 58 Purse Seine vessels, that represent almost 20% of the fleet operating in the area. The FIP is managed by the Tuna Conservation Group (TUNACONS) together with WWF Ecuador and with the support of the Ecuadorian Ministry of aquaculture and fishing, National Fishery Institute, and EPESPO Fishery School of the EPO
