

## Peru mahi-mahi - longline (WWF)

## Overview

**FIP Description**

The Peruvian mahi-mahi fishery includes over 10,000 fishermen and is one of the country's most important artisanal fisheries. Worldwide, Peru is known as the leading international mahi-mahi producer. A critical issue challenging this fishery is the lack of effective national and international management needed to address the highly migratory nature of mahi-mahi. The fishery also needs additional data on how fishing interacts with other species including endangered sea turtles and sharks. The active involvement of FIP stakeholders, such as IMARPE (Peruvian Institute of the Sea), and FIP Participants drives improvements against the Marine Stewardship Council standard.

## How is this FIP Doing?

**Current Status:**

**Actions Progress** This shows the proportion of actions in the workplan that the FIP has completed.

**Actions Overview** This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

Behind	On Track	Complete	Future
28%	28%	44%	0%

**Red Indicator Progress** This shows the proportion of actions specifically addressing red indicators that are behind schedule, on track, completed, or not yet started. This helps users understand the progress the FIP is making on the biggest challenges in the fishery.

Behind	On Track	Complete	Future

**FIP Progress Rating**

A - Advanced Progress

**FIP Objective(s)**

El objetivo del FIP de dorado de Perú es avanzar la pesquería en un enfoque gradual hacia el cumplimiento del estándar del Marine Stewardship Council (MSC) para fines de 2026, y pasar al proceso de evaluación completo para lograr la certificación del MSC después de eso.

**FIP Type**

Comprehensive

**FIP Stage**

Stage 4: Improvements in Fishing Practices or Fishery Management

**Start and Projected End Dates**

November, 2013 -

December, 2026

**Species****Common Name**

Mahi-mahi

**Scientific Name**

Coryphaena hippurus
